

PREFERRED CHOICE CLOSED FORMULARY DRUG LIST

January 2007 Edition

To avoid paying 100% of the cost of non-covered drugs, please ask your prescriber to refer to this formulary drug list when prescribing medications for you and your dependents. Please note that you will pay 100% of the cost of drugs listed in the Non-Covered Drug column.

It is also important to keep in mind that newly FDA-approved medications will be a non-covered drug pending a review by the Pharmacy and Therapeutics Committee.

Please note that this listing does not imply a guarantee of coverage, as covered products and/or categories are subject to individual plan restrictions and/or limitations.

Substitution of generic products is encouraged when available and appropriate. The drugs listed in *Italics* represent generic medications. Please note that a generic product in the covered formulary alternative column may not necessarily be the generic equivalent of the non-covered brand. It does however represent a generic alternative in the same class of drugs.

Periodic updates to the formulary may occur. For the most current formulary information, please call PharmaCare at the toll-free number printed on your member I.D. card, or visit PharmaCare at www.pharmacare.com/members.
